Notes

Population - effective since the 1991 Census, non-permanent residents included in total population.
2001 Census population - based on 2006 boundaries.
Economic family - refers to two or more persons living in the same dwelling, related to each other by blood, marriage, common-law or adoption.
Experienced labour force - includes persons who worked since Jan 1, 2005 and who were employed or unemployed during the reference week.
Non-movers - on Census Day were living at the same address as one or five years previous.
Non-migrant movers - lived at a different address but in the same census subdivision (CSD).
Average - or arithmetic mean is calculated by dividing the sum of included categories by the number of included categories.
Median - an alternate measure of 'averageness'. Median income of a specific group is that amount which divides their income size distribution into two halves (below and above the median).
Prevalence of low income - the percentage of a specific group below Statistics Canada's low income cut-offs (LICO).

Data presented in this report are subject to suppression and random rounding in order to preserve the confidentiality of respondents to the census. The effect is significant in areas with little population or where a particular category drew few responses.

The census is a rich source of demographic data for even small communities, at five year intervals. The information presented here is drawn from a large dataset. Other variables are available by request on a fee for service basis.

Refers to those persons who reported identifying with at least one

Aboriginal group, that is, North American Indian, Métis or Inuit, and/or those who reported being a Treaty Indian or a Registered Indian, as defined by the *Indian Act* of Canada, and/or those who reported they were members of an Indian band or First Nation.

In 1991 and previous censuses, the Aboriginal population was defined using the ethnic origin question (ancestry). The 1996 Census included a question on the individual's perception of his/her Aboriginal identity. The question used in the 2006 and 2001 censuses is the same as the one used in 1996.

* Note: the Chinese (All *) category identified here is calculated as the sum of Chinese, n.o.s. (not otherwise specified), Cantonese, Mandarin, and Taiwanese as these were the only Chinese languages identified in the dataset which is the basis of this graphic profile.

A full accounting of Chinese languages would include additional languages, such as Fukien, Hakka, Shangainese, and Chaochow which will be included in the 'Other languages' category of this report. The effect of this is relatively insignificant but readers may wish to understand why other census sources may contain slightly different figures.

Non-official languages spoken

(This is a count of languages, not persons.
Some persons speak more than one language.)
